

# Mosaïque

# MOSAIQUE

*Riflessi e sfaccettature*

Mosaique nasce dall'idea di giocare con l'acciaio, materiale lucido e riflettente. É una lampada composta da due profili tagliati a laser e piegati a mano che gli conferiscono l'aspetto di un gioiello con i suoi riflessi e le sue sfaccettature.

*Mosaique was born from the play of steel, polished and reflective material. It is a lamp consisting of two laser cut and hand-bent profiles. With its reflections and its facets it appears like a jewel.*

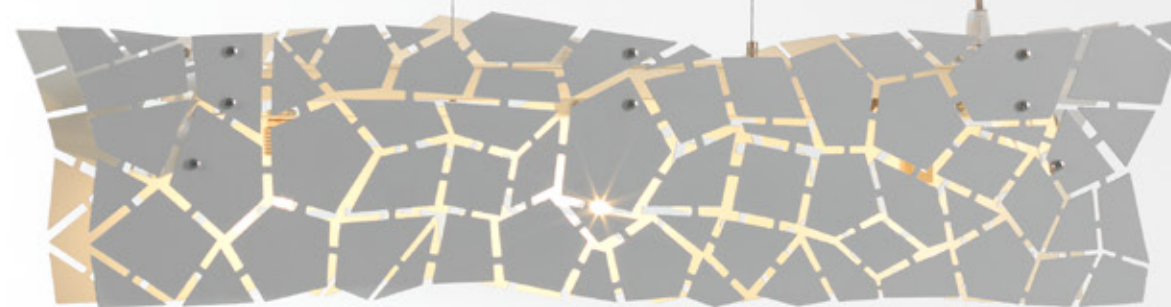

## “LED”..

Principale caratteristica di Mosaiques è la sua versatilità di illuminazione. Infatti è possibile, nella versione con portalampada GU10, montare lampadine al led.

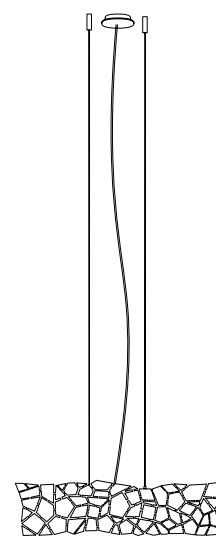

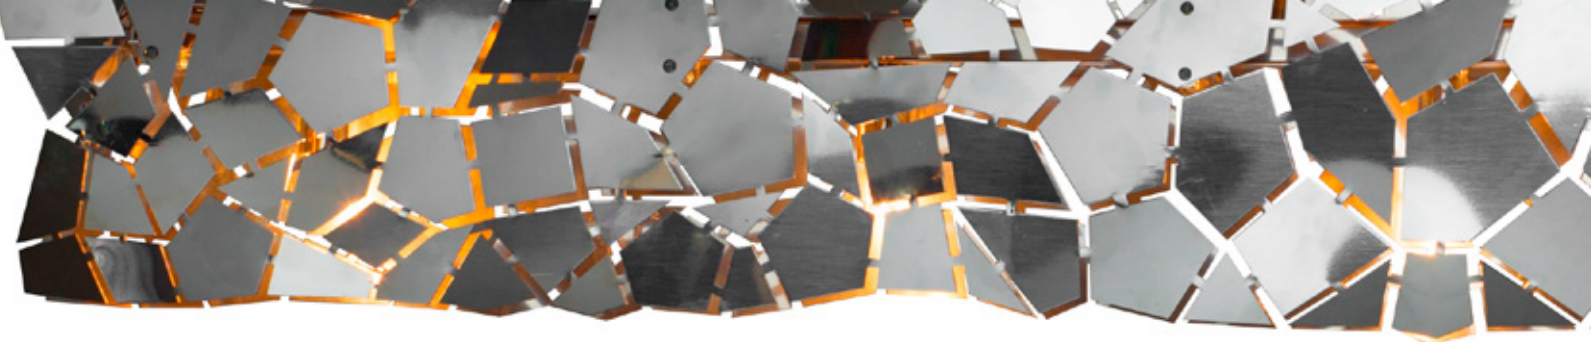

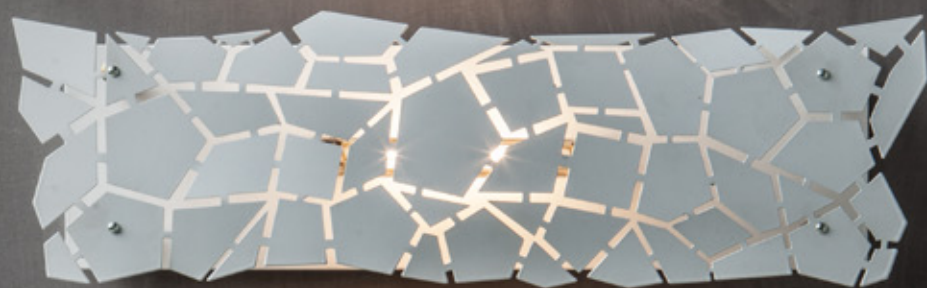

*The main feature of Mosaiques is his versatility of lighting. In fact is possible to use LED bulbs, trough the GU10 socket.*

INFORMAZIONI AGGIUNTIVE:

Mosaique è composta da due lastre di acciaio tagliate al laser lucidate e piegate a mano. Può essere realizzata con due diversi tipi di lampadine G9 e GU10. Quest' ultima soluzione permette anche l'utilizzo di lampadine al led.

Mosaique is composed of two laser cutted and hand folded steel plates. Can be realized in two different types of bulbs G9 and GU10.

These last solution allows also the use of LED bulbs.
